OPTIMA[®] Deck brings science and beauty together in a new era of manufactured decking. Created to answer the issues presented with wood- and PVC-based composite decking materials, OPTIMA[®] Deck uses science-proven ingredients to naturally defy moisture and temperature extremes—two elements that have proven to be the enemy of traditional outdoor products.

Manufactured using all-American, rapidly renewable materials, OPTIMA[®] Deck will not rot, as it contains no wood filler to break down with environmental exposure. And because of its patented blend of BioDac[®], rice hulls, and virgin High Density Polyethylene, OPTIMA[®] Deck is naturally-resistant to the effects of mold and mildew. We're so sure of our product, we're shipping it with a limited lifetime warranty.

If it's a beautiful deck that you're building, you will not find a more dimensionally-realistic wood grain than that which we've designed for our OPTIMA[®] Deck product line. Available in four convincing representations of traditional hardwoods, your guests will be hard-pressed to guess whether your deck is made of wood or manufactured decking.

See Warranty Document for Details.

Why OPTIMA® DECK?

- Superior Color Retention
- Resistant to mold and decay
- Available in square and grooved edge
- Limited Lifetime Warranty
- Available in four convincing wood-grain colors—Boardwalk Gray, Warm Cedar, Black Walnut, and Sedona Red
